Course
fee:
£296

Booking deadline:
Tuesday 4th
June 2019

Tuesday 2nd - Thursday 4th July 2019

The Hayes Conference Centre, Alfreton, Derbyshire

The course programme has been re-written for this year. Changes in hearing aid technology are now occurring very rapidly: this course focuses on new developments and emerging technology. New topics this year include telecare, the internet of things, ear to ear processing, and components (including rechargeable devices). The course is suitable for any Audiologist or Hearing Aid Practitioner who would like an update on current and emerging hearing aid technology and its clinical application.

This course draws on the extensive expertise of the senior training staff who work for hearing aid manufacturers, and includes insight into the rationale behind technology and its application. Our aim is to give confidence to optimise hearing aid settings and critically appraise best practice in light of changing technology. Topics include compression strategies, open fittings, prescriptive formulae, REM signals and protocols, VSM, test-box measurements, verification, speech tests, connectivity, and fitting profound and challenging hearing losses. Talks throughout the course also give opportunity to reflect on key principles in hearing loss rehabilitation.

This course relates to adult hearing aid provision. It does not address paediatric provision, complex needs, or service management issues.

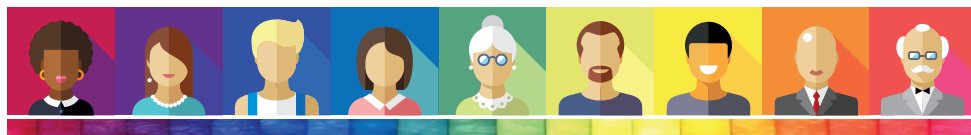

Accommodation and Travel

The course venue is The Hayes Conference Centre, Swanwick, Alfreton, Derbyshire DE55 1AU. Accommodation costs are not included in the course fee.

Bed and breakfast is available at the Conference Centre at £60 per night en-suite, £45 per night non en-suite (shared bathroom). This is booked on my website with the course registration. Accommodation cannot be booked directly with the venue.

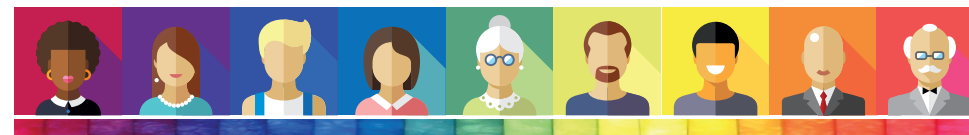

The course fee includes lunch but does not include evening meal. Evening meal on Tuesday and Wednesday is available for residential delegates only, and is included in the accommodation booking at no extra charge.

Leaving the course early on the final afternoon is not advised. Train travel from Alfreton station should be booked for no earlier than 4.30pm, or from Derby station no earlier than 4.45pm.
